Ruth’s work as a consultant is focused on fostering change in higher education across the world; helping to improve engineering teaching and learning worldwide and supporting the emergence of technology-driven entrepreneurship within universities. Her activities range from undertaking international studies designed to benchmark effective practice, to providing targeted support for individual universities and engineering schools. Current and recent clients include Massachusetts Institute of Technology (MIT), Aalborg University, the Royal Academy of Engineering, University College London (UCL), Eindhoven University of Technology (TU/e) and the Pontifical Catholic University of Chile (PUC).

Ruth Graham has been an independent consultant in engineering education and entrepreneurship since 2008, working with engineering industry, universities and professional bodies from across the world. A Mechanical Engineer by training, she specialised in aeronautical fatigue, working with BAE SYSTEMS for a number of years. In 2002 she moved to Imperial College and later became Director of the EnVision project, which sought to transform the undergraduate education across all nine departments in the Faculty of Engineering and improve its culture of support and reward for teaching excellence.
