Hiring Matrix Steps

Hiring Matrix is located on the TEES Personnel Website under “Hiring” forms.
http://tees.tamu.edu/personnel/forms

Step 1: Complete box in upper left corner of Matrix indicating the NOV#, Position Title, Prepared By, and “Signature” of Hiring Supervisor sections.

Note: Hiring Supervisor’s SIGNATURE is required on each page certifying and approving the info on the Matrix.

Step 2: Along the top of the Matrix there are column headings labeled Required Qualifications, Relevant Qualifications, and Preferred Qualifications. These columns should reflect those qualifications specific to your job posting. Change column headings accordingly. Description of each section is listed below:

- **Required Qualifications** – Does the applicant meet the minimum education and experience qualifications of the position based on the position description?
- **Relevant Qualifications** – What is the potential immediate impact this applicant may possess? Does the applicant possess those qualifications to perform this particular job now?
- **Preferred Qualifications** – Does the applicant have work experience or skills in these areas? In this section, you must enter preferred qualifications you are seeking from your applicants.

Note: Preferred qualifications MUST be specified in the position description and in the job posting, in order to rate the applicants on those qualifications.

SCORING:

Score the applicant based on the information provided on their application as it relates to the position’s responsibilities. Scoring is weighted on a 1-5 scale; 1 being applicant’s qualifications least match that of the position and 5 being applicant’s qualifications best match the position responsibilities. If an applicant does not meet the qualifications or the qualification does not apply to the position, place a “0” in the score box.

Note: The Matrix must include ALL applicants who applied, not just those who are interviewed. (A hiring matrix is not required when there is only ONE candidate.)

Step 3: Applications should be reviewed as they are received, then names entered under the “All Applicant Names” section of the matrix. Place a “V” (Veteran) or “F” (Foster Child) in the designated box next to the applicant’s name, if applicable. (This information can be determined and obtained from the Foster Child and Military Service sections of the application.) Score their education, experience, and skills based on your review of their application. The form will automatically calculate the “Application Score” based on your entries. The score will also appear in the “Total Score” box. Veterans and Foster children are to be given preference, if their scores are equal to the highest ranked applicant.

Step 4: Next, determine who will be interviewed. Go to the “application score” column. The applicants with the highest scores should be interviewed. In a case where the top two applicant scores are very close, interview both candidates. In some cases you will want to interview multiple candidates.

Note: Applicants who score the same or higher, than an applicant who is interviewing, should also be interviewed.

Step 5: After interviewing an applicant, enter an ‘interview score’. This score is weighted more and will automatically double when entered on matrix. Example, if you enter 2, 4 will be calculated into the total score box. You will still use the 0-5 scoring scale.

Note: The applicant scoring the highest ‘Total Score’ indicates the applicant who best meets the requirements of that particular position and should be the selected candidate.

Step 6: If a higher scored applicant is not interviewed or selected, a reason/explanation should be noted at the bottom of the hiring matrix form and their applicant status of the employment system should reflect the same reason/s.

Step 7: Attach the Hiring Matrix under the “Hiring Documents” tab in the Employment System when requesting the Hiring Certificate.
