Standard Administrative Procedure Statement
The Texas Engineering Experiment Station (TEES) requires the proper handling and security of credit card information throughout the payment process as provided by this Standard Administrative Procedure (SAP).

Reason for Standard Administrative Procedure
This SAP provides direction for processing and protecting credit card information.

Procedures and Responsibilities

1. GENERAL

   The purpose of this SAP is to identify the procedures that must be followed when processing credit card information and to identify the necessary controls to protect the information being processed.

2. ON-LINE PROCESSING

   All on-line registrations and sales using credit card verification and processing shall be handled through the AggiE-Pay, and denominated in U.S. currency only.

3. GENERAL PROCESSING CONTROLS

   3.1 Protection of Stored Data

      3.1.1 Sensitive cardholder data that includes the account number, magnetic stripe data, card-validation code and expiration date must be properly disposed of when no longer needed. (See section 3.2.5 below)

      3.1.2 The full contents of any track from the magnetic stripe shall not be stored in agency and/or division databases, log files, or point-of-sale products.

      3.1.3 The card-validation code or value (three or four digit number printed on the front or back of a payment card) shall not be stored in
agency and/or division databases, log files, or point-of-sale products.

3.1.4 The personal identification number (PIN) or the encrypted PIN block shall not be stored in agency and/or division databases, log files, or point-of-sale products.

3.1.5 All but the last four digits of the account number must be masked when displaying cardholder data.

3.1.6 Account numbers must be stored securely in databases, logs, files, and backup media (for example, by means of encryption or truncation).

3.2 Access to Cardholder Data

3.2.1 Access to all cardholder data shall be restricted to employees with a legitimate need-to-know. Employees with access to cardholder data shall complete online training for cardholder data security annually.

3.2.2 Procedures regarding multiple security controls shall be developed and be in place to prevent unauthorized individuals from gaining access to the facilities and equipment, such as servers, workstations, laptops, and hard drives and media, containing cardholder data. Controls such as using cameras for sensitive areas, using badges that expire, physically escorting visitors in sensitive areas, or using visitor logs to retain an audit trail can be used. The procedures shall be developed under the responsibility of the division head or assigned designee.

3.2.3 Cardholder data printed on paper or received by fax must either be physically destroyed via shredding or sanitization or protected against unauthorized access by maintaining it in a locked area.

3.2.4 Procedures shall be developed and be in place to handle secure distribution and disposal of backup and other electronic media containing sensitive cardholder data. They should include controls such as labeling media as confidential, sending media via secure couriers, or using secure disposal methods that will provide the assurance of nonrecoverability. The procedures shall be developed under the responsibility of the division head or assigned designee.

3.2.5 Cardholder data must be destroyed or deleted before the paper or electronic media is physically disposed of, using methods such as shredding or sanitization.
3.2.6 Unencrypted primary account numbers (PANs) shall not be sent via end-user messaging technologies.

3.3 Information Security Policies

3.3.1 TEES Personnel Services must perform a background check on every employee given access to sensitive cardholder data. Any criminal history revealed in this check could result in an employee being denied access.

3.3.2 All third parties with access to sensitive cardholder data must be contractually obligated to comply with card association security standards. See Payment Card Industry (PCI) Data Security Standards.

4. RESPONSIBILITIES

The Agency Director delegates responsibility to all division heads or their assigned designee to ensure that the above procedures are implemented in their respective divisions.
