The Texas A&M Cybersecurity Center seeks to advance the collective cybersecurity knowledge, capabilities and practices through groundbreaking research, innovation and education. Working with researchers, faculty and industry leaders, the center prepares a corps of well-educated cybersecurity professionals to pave the way to a cybersecure future.

Texas A&M University holds the distinguished NSA and the Department of Homeland Security National Center for Academic Excellence for Cyber Defense designations for education, research, and cyber operations. It is one of only eight schools in the nation to hold all three designations.

**OUR VISION**

- Texas A&M will make outsized contributions to national and economic security and social good by advancing the knowledge and practice of cybersecurity, and by developing transformational cybersecurity capabilities
- Texas A&M in collaboration with strategic partners, will move to the international forefront of cybersecurity research, education, and trainings

**OUR MISSION**

- Develop novel and innovative methods for cybersecurity education, training and workforce development
- Facilitate the conduct of groundbreaking, basic and applied cybersecurity research
- Build mutually beneficial and fruitful partnerships with commercial, governmental, military and academic partners
